

Request for comments

June 2022

RAEX-Europe invites market participants to provide comments on the proposed changes in the Methodology for assigning environmental, social and governance (ESG) ratings to corporates and financial institutions.

The changes are aimed at increasing the transparency of the ESG rating assignment process and at providing more detail on the stages of risk exposure assessment, risk management assessment, as well as the assessment of controversies and assignment of penalty points. In addition, there are changes to the list of ESG factors assessed.

Please submit your comments to: info@raexpert.eu or compliance@raexpert.eu by the 06.07.2022. All comments received will be considered by the Agency before approval of the final version of the updated Methodology. Your response to this consultation will be published unless confidentiality is requested.
